

Network Vulnerability Assessment Report

Executive summary of scan coverage, severity distribution, and priority findings from the latest assessment.

GENERATED AT
21 April 2026

PREPARED BY
AIS Data Center Thailand

SECTION 1

Total Severity

สรุปภาพรวมผลการสแกนล่าสุด โดยแสดงตัวชี้วัดสำคัญของการประเมิน พร้อมจำนวนข้อบกพร่องในแต่ละระดับความรุนแรง

SECURITY RISK SUMMARY			
Vulnerability Severity Overview			
Consolidated findings by severity level			
▲ TOTAL FINDINGS TOTAL FINDINGS 592 Total findings identified across all scanned devices	🔴 CRITICAL CRITICAL 5 Critical vulnerabilities requiring immediate remediation	🟠 HIGH HIGH 30 High-risk vulnerabilities with significant impact potential	
🟡 MEDIUM MEDIUM 111 Medium-severity findings that should be addressed in due course	🟢 LOW LOW 20 Low-severity findings with limited immediate impact	🔵 INFO INFO 426 Informational observations and security-related notices	

SECTION 2

Severity Distribution Overview

แสดงภาพรวมการกระจายของข้อบกพร่องระดับความรุนแรงในรูปแบบย่อ เพื่อให้เหมาะกับการใช้งาน PDF แบบพหุหน้าเดียว

SEVERITY DISTRIBUTION

Severity Snapshot

Summary of findings by severity level based on the latest consolidated task assessment.

TOTAL FINDINGS

592

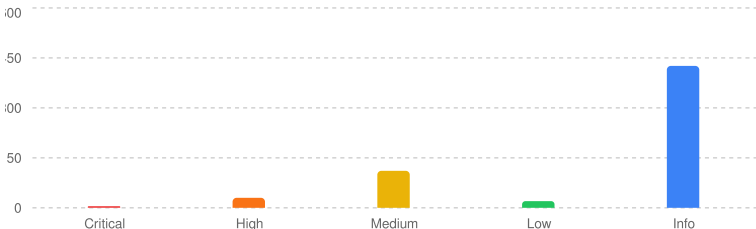

Proportion by Severity

Donut chart showing the proportional distribution of findings.

Findings Count by Severity

Bar chart presenting the total number of findings in each severity category.

Severity Breakdown Table

Detailed breakdown of severity counts and percentage share.

Severity	Findings	Share
🔴 Critical	5	0.8%
🟠 High	30	5.1%
🟡 Medium	111	18.8%
🟢 Low	20	3.4%
🔵 Info	426	72.0%

MANAGEMENT SUMMARY	
Key Critical Findings at a Glance	
Highlighting the most critical vulnerabilities detected in the latest scan, including business impact, affected scope, and recommended remediation actions.	
Remediate within 48 hours	
CRITICAL SEVERITY 9.9 jQuery End of Life (EOL) Detection - Linux Target: GOT-ITS-Controller-1 IP: 10.0.98.3 Detected: 20 Mar 2026 Exposed for: 32 days 1. SUMMARY The jQuery version on the remote host has reached the end of life (EOL) and should not be used anymore. 2. IMPACT An EOL version of jQuery is not receiving any security updates from the vendor. Unfixed security vulnerabilities might be leveraged by an attacker to compromise the security of this host. 3. RECOMMENDED ACTION VENDORFIX Update jQuery on the remote host to a still supported version.	
CRITICAL SEVERITY 9.8 OpenBSD OpenSSH < 9.3p2 RCE Vulnerability Target: GOT-ITS-Switch-5548 IP: 10.10.30.1 Detected: 20 Apr 2026 Exposed for: 1 day CVE: CVE-2023-38408 1. SUMMARY OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent. 2. INSIGHT A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket. 3. AFFECTED SCOPE OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system. 4. RECOMMENDED ACTION VENDORFIX Update to version 9.3p2 or later.	

MANAGEMENT SUMMARY

Key Critical Findings at a Glance

Highlighting the most critical vulnerabilities detected in the latest scan, including business impact, affected scope, and recommended remediation actions.

Remediate within 48 hours

CRITICAL

SEVERITY 9.8

OpenBSD OpenSSH < 9.3p2 RCE Vulnerability

Target: VCenter-NUC

IP: 10.10.40.165

Detected: 20 Apr 2026

Exposed for: 1 day

CVE: CVE-2023-38408

1. SUMMARY

OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent.

2. INSIGHT

A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket.

3. AFFECTED SCOPE

OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system.

4. RECOMMENDED ACTION

VENDORFIX

Update to version 9.3p2 or later.

CRITICAL

SEVERITY 9.8

OpenSSH < 7.2 X11 Forwarding Security Bypass Vulnerability - Linux

Target: GOT-ITS-Switch-5548

IP: 10.10.30.1

Detected: 20 Apr 2026

Exposed for: 1 day

CVE: CVE-2016-1908

1. SUMMARY

OpenSSH is prone to a security bypass vulnerability.

2. INSIGHT

An access flaw was discovered in OpenSSH, it did not correctly handle failures to generate authentication cookies for untrusted X11 forwarding. A malicious or compromised remote X application could possibly use this flaw to establish a trusted connection to the local X server, even if only untrusted X11 forwarding was requested.

3. IMPACT

Successfully exploiting this issue allows local users to bypass certain security restrictions and perform unauthorized actions. This may lead to further attacks.

4. AFFECTED SCOPE

OpenSSH versions before 7.2 on Linux.

5. RECOMMENDED ACTION

VENDORFIX

Update to version 7.2 or later.

MANAGEMENT SUMMARY

Key Critical Findings at a Glance

Highlighting the most critical vulnerabilities detected in the latest scan, including business impact, affected scope, and recommended remediation actions.

⚠ Remediate within 48 hours

CRITICAL

SEVERITY 9.8

Twisted Web < 20.3.0 Multiple Vulnerabilities

🛡 Target: VCenter-NUC

📍 IP: 10.10.40.165

🕒 Detected: 20 Apr 2026

🕒 Exposed for: 1 day

📄 CVE: CVE-2020-10108, CVE-2020-10109

📄 1. SUMMARY

Twisted Web is prone to multiple vulnerabilities.

🕒 2. INSIGHT

The following vulnerabilities exist: - CVE-2020-10108: HTTP request splitting. When presented with two content-length headers, it ignored the first header. When the second content-length value was set to zero, the request body was interpreted as a pipelined request. - CVE-2020-10109: HTTP request splitting. When presented with a content-length and a chunked encoding header, the conten....

🛡 3. AFFECTED SCOPE

Twisted Web prior to version 20.3.0.

🔧 4. RECOMMENDED ACTION

VENDORFIX

Update to version 20.3.0 or later.

Top Device Risk Report

แสดงรายการอุปกรณ์ที่มีความเสี่ยงสูงจากผลการประเมินล่าสุด โดยเรียงลำดับตามค่า Risk Score เพื่อช่วยให้ติดตามอุปกรณ์ที่ต้องการจัดการก่อน ในรูปแบบที่เหมาะสมกับการอ่านบนรายงาน PDF

TOTAL DEVICES

13

Devices assessed in the latest scan cycle.

AVERAGE RISK SCORE (MAX 10.00)

5.07

Average risk level across assessed devices.

1

GOT-ITS-Switch-5548

IP: 10.10.30.1 Risk: 6.08 Vulnerabilities: 60

Firmware: Unknown Device

2

VCenter-NUC

IP: 10.10.40.165 Risk: 5.69 Vulnerabilities: 172

Firmware: Unknown Device

3

GOT-ITS-Controller-1

IP: 10.0.98.3 Risk: 5.53 Vulnerabilities: 85

Firmware: Unknown Device

4

GOT-ITS-SW01

IP: 10.0.99.7 Risk: 5.33 Vulnerabilities: 23

Firmware: Unknown Device

5

GOT-ITS-Controller-2

IP: 10.0.98.4 Risk: 5.32 Vulnerabilities: 61

Firmware: Unknown Device

6

GOT-ITS-SW-H3C1

IP: 10.0.99.16 Risk: 5.26 Vulnerabilities: 61

Firmware: H3C Comware Platform Software, Software Version 7.1.070, Release 6367

7

GOT-Switch-Dell-5524

IP: 10.10.20.1 Risk: 5.25 Vulnerabilities: 20

Firmware: Unknown Device

8

GOT-H3C-S5130

IP: 10.10.10.1 Risk: 5.06 Vulnerabilities: 42

Firmware: Unknown Device

9

Notebook-Tawun

IP: 10.10.20.169 Risk: 5.02 Vulnerabilities: 30

Firmware: Unknown Device

10

GOT-Switch-Dell-3148

IP: 90.90.90.2 Risk: 4.90 Vulnerabilities: 14

Firmware: Unknown Device

11

GOT-VMware-PC

IP: 10.10.100.1 Risk: 4.20 Vulnerabilities: 13

Firmware: Unknown Device

12

GOT-ITS-SW02

IP: 10.0.99.14 Risk: 4.13 Vulnerabilities: 28

Firmware: Dell EMC Networking N1524P, 6.7.1.27, Linux 3.6.5, Not Available

13

GOT-Switch-Dell-3024F

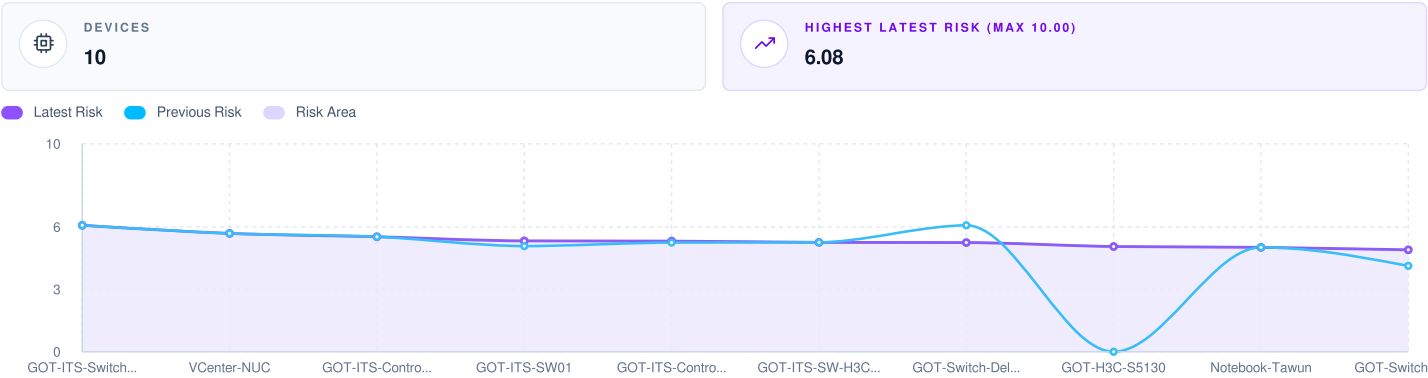

IP: 90.90.90.1 Risk: 4.13 Vulnerabilities: 22

Firmware: Unknown Device

Note: The list is ordered by risk score in descending order and shown 20 devices per page.

Top 10 Risk Score Comparison

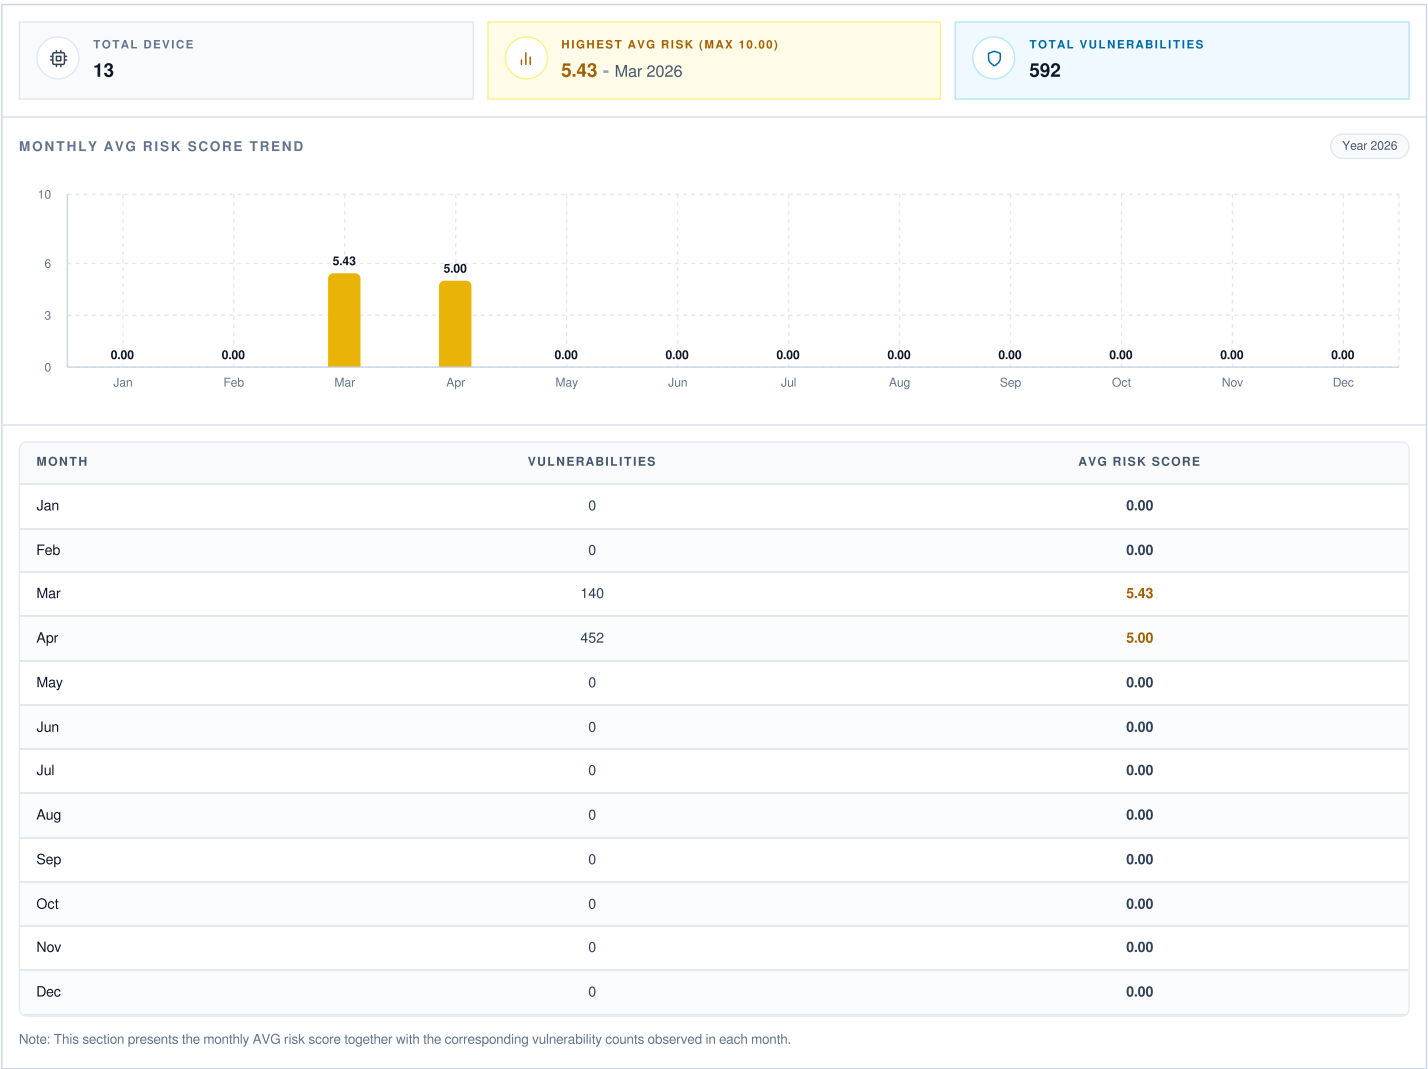

เปรียบเทียบค่า Latest Risk และ Previous Risk ของแต่ละเป้าหมาย เพื่อให้เห็นแนวโน้มความเสี่ยงล่าสุด

หมายเหตุ: แสดงเฉพาะ Top 10 เป้าหมายที่มีค่า Latest Risk สูงที่สุด และเรียงจากมากไปน้อย

Monthly Risk Score Overview

This section presents mock monthly vulnerability counts and risk scores for the current year, together with a compact summary table for report review.

Final Conclusion and Executive Summary

สรุปภาพรวมของรายงานทั้งหมดในหน้าเดียว โดยรวบรวมตัวเลขสำคัญ การกระจายความรุนแรง ความเสี่ยงต่อเป้าหมายหลัก และข้อสังเกตสำหรับการตัดสินใจเชิงปฏิบัติการ

EXECUTIVE CONCLUSION

Consolidated Risk Summary and Final Observation

สรุปภาพรวมของรายงานทั้งหมดในหน้าเดียว โดยได้การช่วยเตือนสำหรับการเปรียบเทียบ และสรุปมุมมองระดับความรุนแรงกับแนวโน้ม Risk Score ของเป้าหมายสำคัญ

แสดงเฉพาะ Top 3 เป้าหมายที่มี risk score สูงสุดจริง

TARGET LIST

#	Device	RISK	VULNS
#1	GOT-ITS-Switch-5548 10.10.30.1	6.08	60
#2	VCenter-NUC 10.10.40.165	5.69	172
#3	GOT-ITS-Controller-1 10.0.98.3	5.53	85

Critical Observation

ข้อเท็จจริงที่ควรติดตามเป็นลำดับต้น

jQuery End of Life (EOL) Detection - Linux

VendorFix GOT-ITS-Controller-1
Severity: 9.90 Host: 10.0.98.3 Detected: 20/03/2026, 19:12:00 Age: 32 days

OpenBSD OpenSSH < 9.3p2 RCE Vulnerability

VendorFix VCenter-NUC
Severity: 9.80 Host: 10.10.40.165 Detected: 20/04/2026, 21:04:21 Age: 1 days

Twisted Web < 20.3.0 Multiple Vulnerabilities

VendorFix VCenter-NUC
Severity: 9.80 Host: 10.10.40.165 Detected: 20/04/2026, 21:04:21 Age: 1 days

Recommended actions

ข้อเสนอแนะเชิงปฏิบัติการสำหรับรอบต่อไป

1. IMMEDIATE

Prioritize remediation for the highest-risk devices and close critical vulnerabilities first.

2. NEAR-TERM

Review Medium and High findings in sequence and verify that affected systems are patched or mitigated.

3. CONTINUOUS

Reassess risk trends monthly and compare future scan results against the current baseline.
