

Network Vulnerability Assessment Report

Executive summary of scan coverage, severity distribution, and priority findings from the latest assessment.

GENERATED AT
29 April 2026

PREPARED BY
AIS Data Center Thailand

Total Severity

แสดงสรุปผลการสแกนล่าสุด พร้อมจำนวนข้อผิดพลาดที่พบ แยกตามระดับความรุนแรง

SECURITY RISK SUMMARY			Consolidated findings by severity level	
Vulnerability Severity Overview				
 TOTAL FINDINGS TOTAL FINDINGS 712 Total findings identified across all scanned devices	 CRITICAL CRITICAL 8 Critical vulnerabilities requiring immediate remediation	 HIGH HIGH 42 High-risk vulnerabilities with significant impact potential		
 MEDIUM MEDIUM 154 Medium-risk issues to address soon	 LOW LOW 29 Low-severity findings with limited immediate impact	 INFO INFO 479 Informational observations and security-related notices		

Severity Distribution Overview

แสดงจำนวนข้อผิดพลาดในแต่ละระดับความรุนแรงในรูปแบบกราฟ

SEVERITY DISTRIBUTION

Severity Snapshot

Summary of findings by severity level based on the latest consolidated task assessment.

TOTAL FINDINGS

712

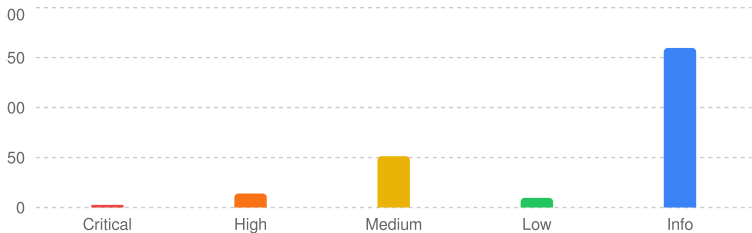

Proportion by Severity

Donut chart showing the proportional distribution of findings.

Findings Count by Severity

Bar chart presenting the total number of findings in each severity category.

Severity Breakdown Table

Detailed breakdown of severity counts and percentage share.

Severity	Findings	Share
Critical	8	1.1%
High	42	5.9%
Medium	154	21.6%
Low	29	4.1%
Info	479	67.3%

MANAGEMENT SUMMARY	
Key Critical Findings at a Glance Highlighting the most critical vulnerabilities detected in the latest scan, including business impact, affected scope, and recommended remediation actions.	
Remediate within 48 hours	
CRITICAL SEVERITY 9.9 jQuery End of Life (EOL) Detection - Linux Target: GOT-ITS-Controller-1 IP: 10.0.98.3 Detected: 20 Mar 2026 Exposed for: 40 days 1. SUMMARY The jQuery version on the remote host has reached the end of life (EOL) and should not be used anymore. 2. IMPACT An EOL version of jQuery is not receiving any security updates from the vendor. Unfixed security vulnerabilities might be leveraged by an attacker to compromise the security of this host. 3. RECOMMENDED ACTION VENDORFIX Update jQuery on the remote host to a still supported version.	
CRITICAL SEVERITY 9.8 OpenBSD OpenSSH < 9.3p2 RCE Vulnerability Target: GOT-Dell-3024-01 IP: 90.90.90.1 Detected: 22 Apr 2026 Exposed for: 7 days CVE: CVE-2023-38408 1. SUMMARY OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent. 2. INSIGHT A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket. 3. AFFECTED SCOPE OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system. 4. RECOMMENDED ACTION VENDORFIX Update to version 9.3p2 or later.	

MANAGEMENT SUMMARY

Key Critical Findings at a Glance

Highlighting the most critical vulnerabilities detected in the latest scan, including business impact, affected scope, and recommended remediation actions.

Remediate within 48 hours

CRITICAL

SEVERITY 9.8

OpenBSD OpenSSH < 9.3p2 RCE Vulnerability

Target: GOT-Switch-Dell-3148

IP: 90.90.90.2

Detected: 23 Apr 2026

Exposed for: 6 days

CVE: CVE-2023-38408

1. SUMMARY

OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent.

2. INSIGHT

A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket.

3. AFFECTED SCOPE

OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system.

4. RECOMMENDED ACTION

VENDORFIX

Update to version 9.3p2 or later.

CRITICAL

SEVERITY 9.8

OpenBSD OpenSSH < 9.3p2 RCE Vulnerability

Target: GOT-Switch-Dell-5524

IP: 10.10.20.1

Detected: 23 Apr 2026

Exposed for: 6 days

CVE: CVE-2023-38408

1. SUMMARY

OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent.

2. INSIGHT

A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket.

3. AFFECTED SCOPE

OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system.

4. RECOMMENDED ACTION

VENDORFIX

Update to version 9.3p2 or later.

MANAGEMENT SUMMARY	
Key Critical Findings at a Glance Highlighting the most critical vulnerabilities detected in the latest scan, including business impact, affected scope, and recommended remediation actions.	
Remediate within 48 hours	
CRITICAL SEVERITY 9.8 OpenBSD OpenSSH < 9.3p2 RCE Vulnerability Target: GOT-Switch-Dell-S3024 IP: 90.90.90.1 Detected: 23 Apr 2026 Exposed for: 6 days CVE: CVE-2023-38408 1. SUMMARY OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent. 2. INSIGHT A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket. 3. AFFECTED SCOPE OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system. 4. RECOMMENDED ACTION VENDORFIX Update to version 9.3p2 or later.	
CRITICAL SEVERITY 9.8 OpenBSD OpenSSH < 9.3p2 RCE Vulnerability Target: VCenter-NUC IP: 10.10.40.165 Detected: 20 Apr 2026 Exposed for: 9 days CVE: CVE-2023-38408 1. SUMMARY OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent. 2. INSIGHT A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket. 3. AFFECTED SCOPE OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system. 4. RECOMMENDED ACTION VENDORFIX Update to version 9.3p2 or later.	

MANAGEMENT SUMMARY	
Key Critical Findings at a Glance Highlighting the most critical vulnerabilities detected in the latest scan, including business impact, affected scope, and recommended remediation actions.	
Remediate within 48 hours	
CRITICAL SEVERITY 9.8 OpenSSH < 7.2 X11 Forwarding Security Bypass Vulnerability - Linux Target: GOT-Switch-Dell-5524 IP: 10.10.20.1 Detected: 23 Apr 2026 Exposed for: 6 days CVE: CVE-2016-1908 1. SUMMARY OpenSSH is prone to a security bypass vulnerability. 2. INSIGHT An access flaw was discovered in OpenSSH, it did not correctly handle failures to generate authentication cookies for untrusted X11 forwarding. A malicious or compromised remote X application could possibly use this flaw to establish a trusted connection to the local X server, even if only untrusted X11 forwarding was requested. 3. IMPACT Successfully exploiting this issue allows local users to bypass certain security restrictions and perform unauthorized actions. This may lead to further attacks. 4. AFFECTED SCOPE OpenSSH versions before 7.2 on Linux. 5. RECOMMENDED ACTION VENDORFIX Update to version 7.2 or later.	
CRITICAL SEVERITY 9.8 Twisted Web < 20.3.0 Multiple Vulnerabilities Target: VCenter-NUC IP: 10.10.40.165 Detected: 20 Apr 2026 Exposed for: 9 days CVE: CVE-2020-10108, CVE-2020-10109 1. SUMMARY Twisted Web is prone to multiple vulnerabilities. 2. INSIGHT The following vulnerabilities exist: - CVE-2020-10108: HTTP request splitting. When presented with two content-length headers, it ignored the first header. When the second content-length value was set to zero, the request body was interpreted as a pipelined request. - CVE-2020-10109: HTTP request splitting. When presented with a content-length and a chunked encoding header, the conten... 3. AFFECTED SCOPE Twisted Web prior to version 20.3.0. 4. RECOMMENDED ACTION VENDORFIX Update to version 20.3.0 or later.	

Top Device Risk Report

แสดงรายการอุปกรณ์ที่มีความเสี่ยงสูงจากผลการประเมินล่าสุด โดยเรียงลำดับตามค่า Risk Score เพื่อช่วยให้ติดตามอุปกรณ์ที่ควรได้รับการจัดการก่อน

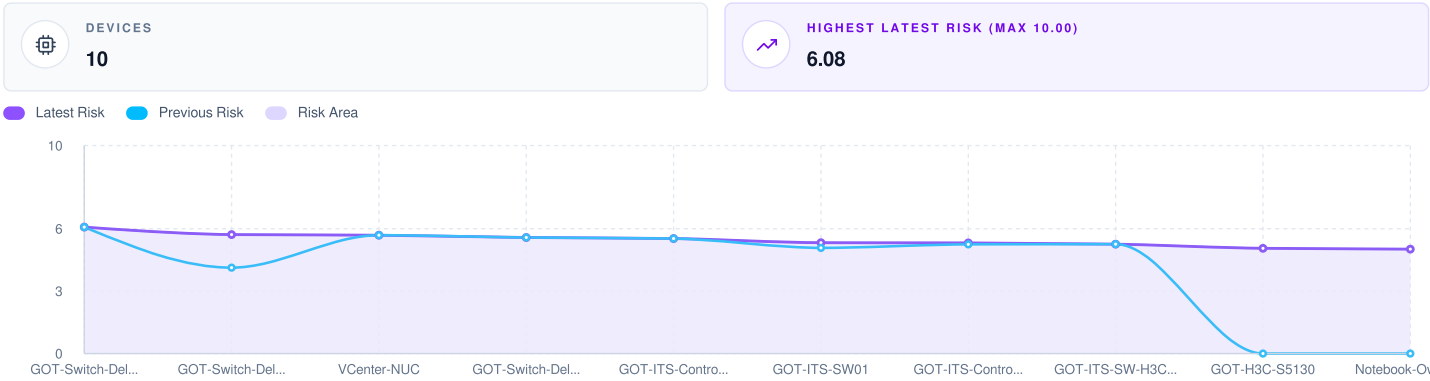

TOTAL DEVICES

16

Devices assessed in the latest scan cycle.

Top 10 Risk Score Comparison

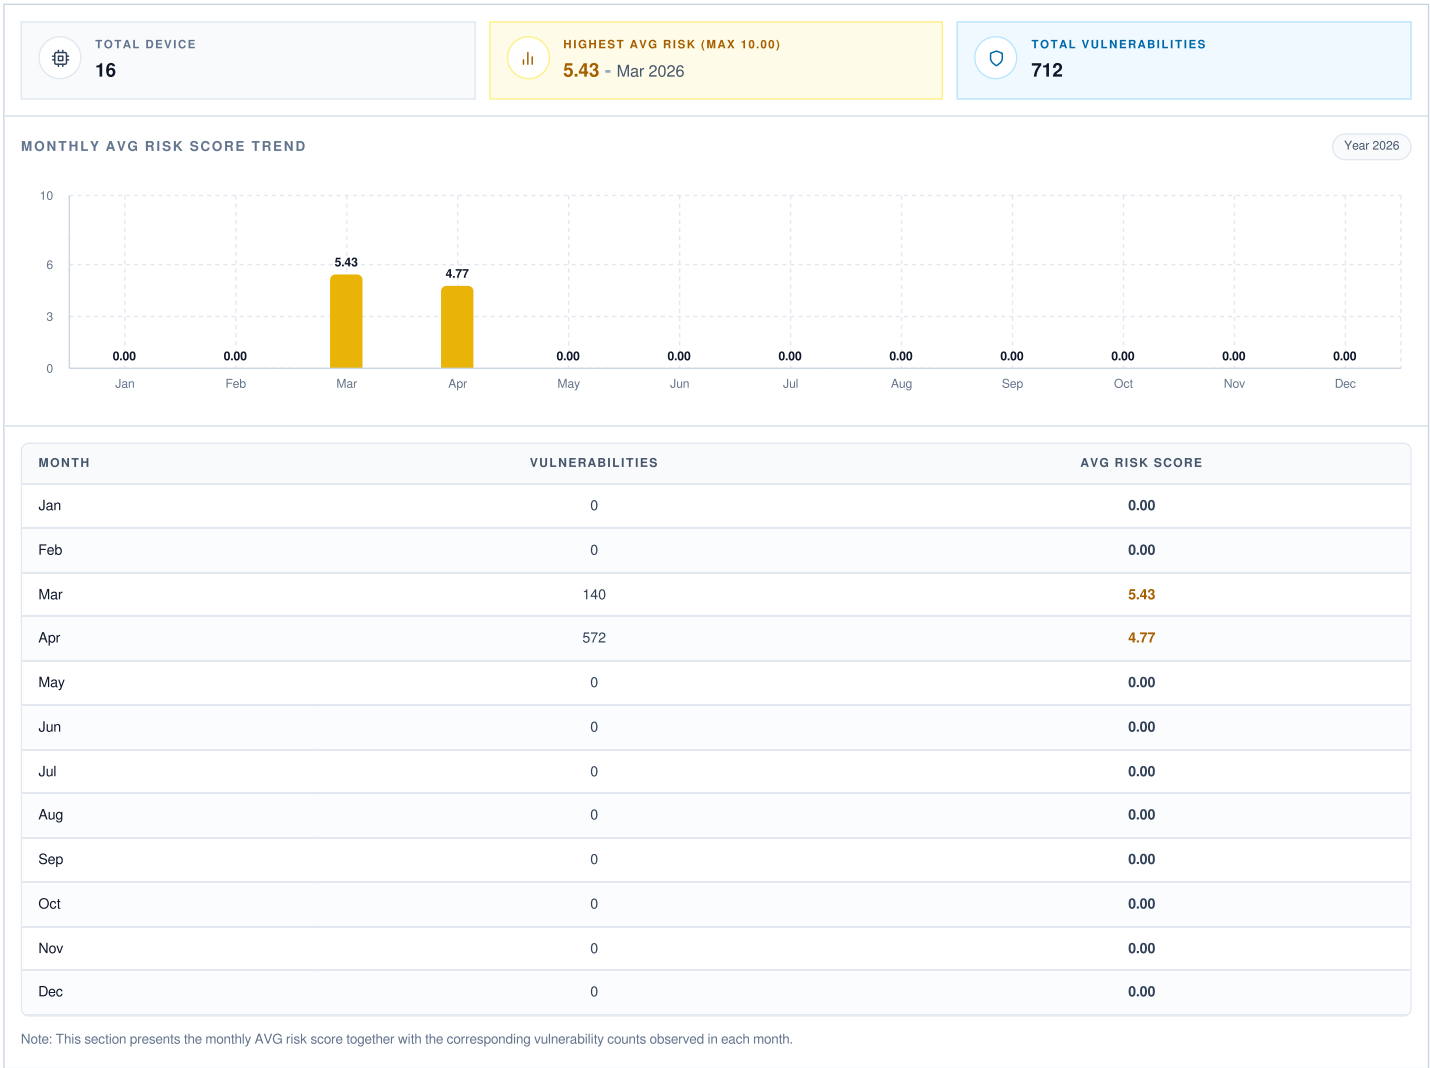

เปรียบเทียบค่า Latest Risk และ Previous Risk ของแต่ละเป้าหมาย เพื่อให้เห็นแนวโน้มความเสี่ยงล่าสุด

Note: Only the Top 10 targets with the highest Latest Risk are displayed, sorted in descending order.

Monthly Risk Score Overview

แสดงจำนวนข้อบกพร่องและค่า Risk Score รายเดือนของปีปัจจุบัน พร้อมตารางสรุปสำหรับใช้ตรวจสอบรายงาน

Final Conclusion and Executive Summary

สรุปภาพรวมของรายงานทั้งหมดในหน้าเดียว โดยรวบรวมตัวเลขสำคัญ การกระจายความรุนแรง ความเสี่ยงของเป้าหมายหลัก และข้อสังเกตสำหรับการตัดสินใจเชิงปฏิบัติการ

EXECUTIVE CONCLUSION

Consolidated Risk Summary and Final Observation

สรุปภาพรวมของรายงานทั้งหมดในหน้าเดียว โดยได้รวบรวมข้อมูลสำหรับการเปรียบเทียบ และสรุปมุมมองระดับความรุนแรงร่วมกับแนวโน้ม Risk Score ของเป้าหมายสำคัญ

Top 3 Device Risk

แสดงเฉพาะ Top 3 เป้าหมายที่มี risk score สูงสุดจริง

Device	Risk Score	Vulns
#1	6.08	58
#2	5.72	40
#3	5.69	157

TARGET LIST

#1	GOT-Switch-Dell-5524 10.10.20.1	RISK 6.08	VULNS 58
#2	GOT-Switch-Dell-3148 90.90.90.2	RISK 5.72	VULNS 40
#3	VCenter-NUC 10.10.40.165	RISK 5.69	VULNS 157

Critical Observation

ข้อเฝ้าระวังที่ควรติดตามเป็นลำดับต้น

jQuery End of Life (EOL) Detection - Linux

VendorFix GOT-ITS-Controller-1

Severity: 9.90 Host: 10.0.98.3 Detected: 20/03/2026, 19:12:00 Age: 40 days

OpenBSD OpenSSH < 9.3p2 RCE Vulnerability

VendorFix GOT-Switch-Dell-5524

Severity: 9.80 Host: 10.10.20.1 Detected: 23/04/2026, 12:26:31 Age: 6 days

OpenSSH < 7.2 X11 Forwarding Security Bypass Vulnerability - Linux

VendorFix GOT-Switch-Dell-5524

Severity: 9.80 Host: 10.10.20.1 Detected: 23/04/2026, 12:26:31 Age: 6 days

Recommended actions

ข้อเสนอแนะเชิงปฏิบัติการสำหรับรอบต่อไป

1. IMMEDIATE

Prioritize remediation for the highest-risk devices and close critical vulnerabilities first.

2. NEAR-TERM

Review Medium and High findings in sequence and verify that affected systems are patched or mitigated.

3. CONTINUOUS

Reassess risk trends monthly and compare future scan results against the current baseline.
